Building Information Modeling (BIM) is the process of generating and managing building data during its life cycle using multi-dimensional, real-time, dynamic building modeling software to decrease wasted time and resources in building design and construction. The **Generation BIM** is upon us and, collaboratively, the future leaders of the design and construction industry want to spend an evening discussing BIM.

Panel: **Matt Baker**, P.J. Dick Inc.

Ralph Horgan, Carnegie Mellon University

Josh Lorenz, Meyer Unkovic & Scott LLP

Scott Womack, WTW Architects

Jeff Burd, BreakingGround Publisher
Moderator
