

The Supervisory Training Program

Learning today... leading tomorrow

New Program Release!

AGC of America is thrilled to release the new Supervisory Training Program (STP) **Unit 7: Accident Prevention & Loss Control, seventh edition.**

Unit 7 was rewritten to reflect changes in OSHA standards and safety philosophies in the construction industry over the past several years. The new unit includes more performance based concepts, develops a risk management philosophy, focuses on today's needs for overall site safety management and addresses the cost of accidents and consequences of poor safety performance.

Participants in the new Unit 7 course will cover:

- An introduction to site safety and health management
- Safety leadership, communication and expectations
- Planning for site safety
- Site safety management
- Site security and projection
- Multi-employer jobsite safety
- Construction risk management
- Safety and human resources
- Regulatory procedures, record keeping and documentation
- Safety reference material and other resources

This unit is now available for purchase in the AGC Bookstore by calling 1-800-242-1767 or by visiting www.agc.org. The sixth edition is no longer available for Unit 7.

For questions or additional information concerning the new course, please contact Amy Fields at fieldsa@agc.org or 703/837-5360.

STP Curriculum

The STP is a construction specific training curriculum developed, updated and field-tested by and for contractors. The program consists of 12 comprehensive courses that focus on the knowledge and skills that every supervisor must have to be an effective manager of people, time, equipment and material.

Learn more about STP by visiting www.agc.org/STP.
