

## The Key Role of Construction in Minnesota's Economy

- The industry **employed 123,900 workers** in December 2007, 4% of the state's nonfarm employment of 2,768,100 and a decrease of 4% from one year before. Nationally, construction accounted for 5% of nonfarm employment but fell 2.9% over the year as homebuilding shrank.
- Construction **contributed \$11 billion to state GDP** of \$245 billion in 2006.
- **Annual pay** in 2006 in construction averaged \$47,990, 13% more than the private sector average of \$42,322. Nationally, construction pay averaged \$44,496, 5% more than the national private sector average of \$42,414.
- **Small business** is big in construction. Minnesota had 18,177 construction firms in 2005, of which 94% employed fewer than 20 workers. In addition, Minnesota had 48,404 construction firms without employees, mainly sole proprietorships, in 2005.
- Minnesota's **population** grew 0.8% from July 2006 to July 2007, 26th fastest of all states; the national growth rate was 1%. Population growth affects the demand for many types of construction.
