

## The Key Role of Construction in Ohio's Economy

The industry **employed 220,000 workers** in May 2008, 4% of the state's nonfarm employment of 5,418,000 and a decrease of 2.9% from one year before. Nationally, construction accounted for 5% of nonfarm employment but fell 5.1% over the year as homebuilding shrank.

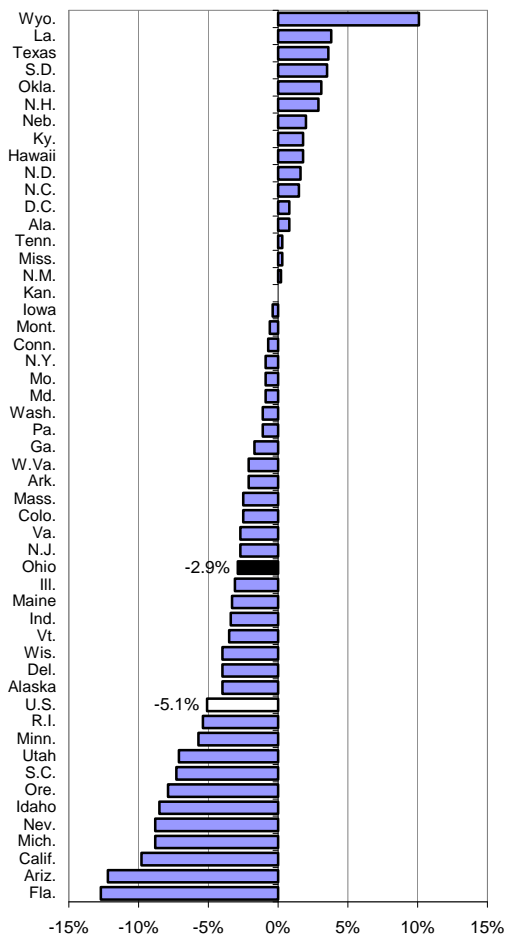

Construction **contributed \$16 billion to state GDP** of \$466 billion in 2007.

**Annual pay** in 2006 in construction averaged \$42,179, 11% more than than the private sector average of \$38,100. Nationally, construction pay averaged \$44,496, 5% more than the national private sector average of \$42,414.

**Small business** is big in construction. Ohio had 26,000 construction firms in 2005, of which 92% employed fewer than 20 workers. In addition, Ohio had 97,000 construction firms without employees, mainly sole proprietorships, in 2005.

Ohio's **population** was unchanged from July 2006 to July 2007, 49th fastest of all states; the national growth rate was 1%. Population growth affects the demand for many types of construction.
