

A ConsensusDOCS Webinar:

What is the Price of Time on a Construction Project?

Nov. 6 2008 at 2:00 - 3:00 PM ET

*Project Management
Best Practices
Regarding Project
Delays*

Register at: www.agc.org/timecosts

NEW PROGRAM | Attendees of *What is the Price of Time on a Construction Project?* will learn project management best practices regarding delay on a project. An experienced construction professional will provide proven techniques to determine and minimize costs associated with time delays.

TOPICS:

- The five basic methods for calculating costs on a construction project.
- The nature of delay costs related to labor, equipment and materials.
- The difference between costs associated with idle labor and equipment; extended labor and equipment; and inefficient labor and equipment.
- The risks associated with cost escalation and how these costs may be recoverable.
- How to evaluate and calculate field overhead costs associated with a critical project delay.

SPEAKER:

Bill Manginelli, Principal, Trauner Consulting Services

REGISTRATION:

Registration is open to members and non-members. Members: \$149 Non-members: \$229.
