

How to Make BIM Work and Navigate the Legal Concerns

June 24, 2009 from 1:00 - 2:30 pm EST

Key Topics

- BIM: What is it and how you can take advantage of it?
- What are the legal risks involved with BIM and how you can address them?
- The Top Ten Myths associated with BIM

Building Information Modeling (BIM) is a powerful tool that is transforming the design and construction industry. Owners, Architects and Contractors are tapping into BIM as a competitive advantage to increase project efficiency and improve overall results. The biggest obstacle for many, however, is navigating the legal issues involved with BIM.

Join us June 24, 2009 to hear firsthand from an Owner, Architect and Contractor on how they have dealt with the legal ramifications of moving into a 3-D world of design and construction and how the ConsensusDOCS 301 BIM Addendum addresses these risk allocation and administration issues as the first standard BIM contract document.

Speakers

- E. Davis Chauviere, AIA
HKS, Inc.
- Jan Reinhardt
ADEPT Project Delivery
- Charles G. Hardy
US General Services Administration
