

## EPA's Construction Stormwater Program: *What the New Mandated Discharge Limits, Monitoring Requirements and Prescriptive E&S Controls Mean for Contractors*

Tuesday, March 2 | 1:30 pm - 3:00 pm ET

Prepare now for first-time nationwide discharge limits and monitoring requirements for construction site stormwater runoff. The U.S. Environmental Protection Agency (EPA) has set a numeric limit for how clear the stormwater runoff from construction sites must be and "operators" of those sites that are subject to the numeric limit must monitor all of their stormwater discharges to show compliance. Penalties for violating these new federal requirements - called **Construction and Development Effluent Limitations Guidelines (C&D ELG)** - may reach *\$37,500 per day per violation*.

### EPA EXPERTS WILL EXPLAIN:

- When the C&D ELG rule will apply to "operators" of construction projects; and
- The new numeric turbidity limit and discharge monitoring requirements; and
- The mandatory erosion and sediment controls and pollution prevention measures for all sites required to obtain stormwater permit coverage; and
- The process by which EPA and state water permitting authorities are working to establish the details of how to sample stormwater from construction sites (through their respective NPDES construction general permits) and report on results.
- A proposed first-time nationwide rule planned for November 2012 that would restrict stormwater discharges from newly developed and redeveloped sites.

### AGC ACTION

In addition, AGC's outside legal counsel will discuss why the C&D ELG rule is likely to result in increased exposure of construction stormwater permittees to state and EPA enforcement actions and AGC's response to recent national stormwater initiatives aimed at restricting stormwater runoff from construction sites.

### WHO SHOULD ATTEND?

Anyone who has control over construction plans and specifications and/or day-to-day supervision or control of activities occurring at a construction site. Also project design engineers, suppliers and other service providers.

### REGISTRATION FEE:

\$79 member

\$119 non-member
