

**Webinar**

**Earth Day - April 22, 2010**  
**3:00-4:30 pm ET**

**Key Topics:**

- Identify unique risks in building green projects
- Review contractual best practices for green building
- Distinguish project participants' roles and responsibilities

**Celebrate Earth Day and Learn How to Contract for Green Building Projects!**

For owners seeking a third-party green-building certification such as LEED, it is essential to all parties that the green building objectives and responsibilities are clearly delineated in order to effectively achieve project goals.

The contracting mechanisms for building green projects can play a key role in outlining measurable objectives and designating roles and responsibilities.

Using the new ConsensusDOCS 310 as a baseline for examples, attendees for this program will learn from green building experts how to:

- Identify unique risks in building green
- Review contractual best practices for green building
- Distinguish project participants and their respective roles and responsibilities
- Determine the green building facilitator

Registration:

Member ConsensusDOCS Endorsing Organization: \$20  
Non-Member: \$49  
Duration: 90 minutes (including live Q & A)
