**Footnotes:**

<sup>1</sup> **Area:** Metropolitan statistical areas (MSAs) are designated by the Office of Management and Budget. MSAs generally cover one or more entire counties or county equivalents or New England City and Town Area (NECTA) in the six New England states. Each MSA is listed under the state in which the largest part of its population lives, even though the first (most populous) city in the MSA's name may be in an adjoining state. There are 11 MSAs with more than 2,500,000 people. Employment in these MSAs is presented in two or more Div.s (MDs) or subdivisions of MDs, rather than for the MSA as a whole.

<sup>2</sup> **Industry:** The Bureau of Labor Statistics (BLS) reports employment for construction, mining and logging combined for six states, the District of Columbia and MSAs in which mining and logging have only a small number of employers. To facilitate comparisons between MSAs and the states they are in, AGC has calculated combined employment change in states for which BLS reports the industries separately.

<sup>3</sup> **Rank:** AGC calculated ranks based on the 12-month percent change, rounded to the nearest whole percent. Because BLS reports employment rounded to the nearest 100, it is not possible to calculate percent changes more accurately than to the nearest whole percent. Thus, all MSAs with the same whole-percent change in employment are ranked the same.
