

Construction Safety Excellence Awards (CSEA) Contact List

Purpose of the CSEA

The purpose of the CSEA is to recognize those construction companies who excel at safety performance. CSEA will closely examine each candidate's commitment to safety and occupational health management and risk control. Unlike the National AGC Safety Awards (NASA) program that limits the criteria to frequency rates, the CSEA selection process is considerably more comprehensive. Judges look for evidence of company management commitment, active employee participation, safety training, work site hazard identification and control, and safety program innovation.

Use this contact list as a resource if your chapter is a non-participating Chapter in the CSEA Process, does not have an active safety program, or does have an active safety program and needs guidance. Use this list for questions regarding the CSEA application, completing the application, submitting the application, and processes after submitting the application. If you are still unable to get your desired information, please contact Kevin Cannon, AGC of America, Director of Safety and Health at 703-837-5410 or cannonk@agc.org.
