Minneapolis-St. Paul-Bloomington, MN-WI	Mining, logging, and construction		89,800	2005	95,400	-6%	1991	54,500	65%

**State List of Construction Employment by Metropolitan Area or Division, May 1990–May 2018, with Peak and Trough Years**  
(May data only; not seasonally adjusted)

Area <sup>1</sup>	Industry <sup>2</sup>	June History <sup>2</sup> (red dot = peak, blue dot = trough) (• peak, • trough)	June '18	Previous Highest June			Previous Lowest June		
				Year	Employment	% Change	Year	Employment	% Change
Wyoming									
Casper, WY	Construction		2,700	2014	3,500	-23%	1993	1,500	80%
Cheyenne, WY	Mining, logging, and construction		4,000	2013	4,000	0%	1990	1,600	150%

**Footnotes:**

<sup>1</sup>**Area:** Metropolitan statistical areas (MSAs) are designated by the Office of Management and Budget. MSAs generally cover one or more entire counties or county equivalents or New England City and Town Area (NECTA) in the six New England states. Areas that cover parts of multiple states are listed in Roman font under the state in which the largest part of its population lives and also *in italic font at the bottom of the listings for other states covered by the MSA or division*. There are 11 MSAs with more than 2,500,000 people. Employment in these MSAs is presented in two or more divisions (Div.) or subdivisions rather than for the MSA as a whole. See Metro Divisions tab for employment in those metros and each of their divisions. Click [here](#) for a list of counties in each MSA and division.

<sup>2</sup>**Industry:** The Bureau of Labor Statistics (BLS) only reports construction employment combined with mining and logging in most metros, because of small sample sizes or to preserve confidentiality for industries with few employers. Metro data is not seasonally adjusted.

<sup>3</sup>**June History:** Red dots are peaks and Blue dots are troughs. If a trough or peak value occurs multiple times, it appears multiple times on the line. The Previous Highest and Lowest columns show the most recent occurrence. The BLS began reporting construction employment in 1990 for 344 metro areas; data for 14 more areas were added in 1992–2005.
