#### Footnotes:

<sup>&</sup>lt;sup>1</sup>Area: Metropolitan statistical areas (MSAs) are designated by the Office of Management and Budget. MSAs generally cover one or more entire counties or county equivalents or New England City and Town Area (NECTA) in the six New England states. Areas that cover parts of multiple states are listed in Roman font under the state in which the largest part of its population lives and also in italic font at the bottom of the listings for other states covered by the MSA or division. There are 11 MSAs with more than 2,500,000 people. Employment in these MSAs is presented in two or more divisions (Div.) or subdivisions rather than for the MSA as a whole. See Metro Divisions tab for employment in those metros and each of their divisions. Click here for a list of counties in each MSA and division.

<sup>&</sup>lt;sup>2</sup>Industry: The Bureau of Labor Statistics (BLS) only reports construction employment combined with mining and logging in most metros, because of small sample sizes or to preserve confidentiality for industries with few employers. Metro data is not seasonally adjusted.

<sup>&</sup>lt;sup>3</sup>History: Red dots are peaks and Blue dots are troughs. If a trough or peak value occurs multiple times, it appears multiple times on the line. The Previous Highest and Lowest columns show the most recent occurrence. The BLS began reporting construction employment in 1990 for 344 metro areas; data for 14 more areas were added in 1992–2005.
