**Footnotes:**

<sup>1</sup>**Area:** Metropolitan statistical areas (MSAs) are designated by the Office of Management and Budget. MSAs generally cover one or more entire counties or county equivalents or New England City and Town Area (NECTA) in the six New England states. Areas that cover parts of multiple states are listed in Roman font under the state in which the largest part of its population lives and also *in italic font at the bottom of the listings for other states covered by the MSA or division*. There are 11 MSAs with more than 2,500,000 people. Employment in these MSAs is presented in two or more divisions (Div.) or subdivisions rather than for the MSA as a whole. See U.S. Census Bureau for definitions of MSAs and divisions.

<sup>2</sup>**Industry:** The Bureau of Labor Statistics (BLS) reports employment for construction, mining and logging combined for six states, the District of Columbia and MSAs in which mining and logging have only a small number of employers. To facilitate comparisons between MSAs and the states they are in, AGC has calculated combined employment change in states for which BLS reports the industries separately.

<sup>3</sup>**Rank:** BLS currently provides construction (or combined construction, mining and logging) employment data for 339 metro areas. AGC calculated ranks based on the 12-month percent change, rounded to the nearest whole percent. Because BLS reports employment rounded to the nearest 100, it is not possible to calculate percent changes more accurately than to the nearest whole percent. Thus, all metro areas with the same whole-percent change in employment are ranked the same.
