

## The Economic Impact of Construction in the United States and Nevada

### Economic Impact of Construction:

- U.S. gross domestic product (GDP)—the value of all goods and services produced in the country—totaled \$23.0 trillion in 2021; construction contributed \$959 billion (4.2%).
- Construction is especially important in Nevada. In 2021, construction contributed \$51.3 billion or 7.4% of the state’s GDP of \$193 billion. This was a larger share of GDP than in any other state.
- There were 872,000 construction establishments in the U.S. in 2021, including 5,800 in Nevada. (An establishment is a fixed business location; about 99% of construction firms have only one establishment.)

### Construction Spending:

- Nonresidential spending in the U.S. totaled \$823 billion in 2021 (\$486 billion private, \$338 billion public).
- Residential construction spending in the U.S. totaled \$803 billion (\$423 billion single-family, \$101 billion multifamily, \$269 billion improvements, \$9 billion public).
- Private nonresidential spending in Nevada totaled \$4.8 billion in 2021. State and local spending totaled \$2.8 billion. (Totals are not available for residential, railroad, power, communication, or federal construction spending).

### Construction Employment (Seasonally Adjusted):

- Construction (residential + nonresidential) employed 7.7 million workers in August 2022, an increase of 311,000 (4.2%) from August 2021, and 1.1% more than in February 2020, the peak pre-pandemic month.
- Construction employment in Nevada in August 2022 totaled 103,100, an increase of 4,700 (4.8%) from August 2021, and 3.8% more than in February 2020.
- Contractors are having trouble filling positions, impeding the industry’s recovery. In the August 2022 AGC-Autodesk Workforce Survey, 93% of firms nationally had unfilled hourly craft positions.

### Construction Industry Pay:

- Construction jobs pay well. In Nevada, 4 of the 5 most numerous construction occupations had higher median annual pay than the median for all employees in the state in 2021. (Half of workers earn more than the median; half earn less.)
