DIRECTOR'S POLICY MEMORANDUM

CIVIL WORKS PROGRAMS

No. DPM CW 2018-06

Issuing Office: CECW

Issued: 15 May 2018

Expires: Indefinite

SUBJECT: Designation of a Lead USACE District for Permitting of Non-USACE Projects Crossing multiple Districts or States

CATEGORY: Directive and Policy

1. **Reference.** Memorandum for Commanders, Major Subordinate Commands and District Commands, "Lead District Initiative (LDI)", dated 22 November 2004.

2. **Purpose.** The purpose of this memorandum is to establish the policy for designating a lead district for non-USACE project permit and permission decisions that cross districts or states boundaries. A non-USACE project is defined as any activity undertaken by a non-USACE entity that requires Section 10/404/103 review(s) and/or Section 408 review(s), as specified in the next paragraph.

3. **Applicability.** This memorandum is applicable to all headquarters USACE elements, divisions, districts, and field operating activities responsible for executing the statutory authorities under the Section 10 of the Rivers and Harbors Act of 1899, Section 404 of the Clean Water Act, Section 103 of the Marine Protection, Research, and Sanctuaries Act of 1972 (Section 10/404/103 reviews), and Section 14 of the Rivers and Harbors Act of 1899 (Section 408 reviews).

4. **Direction.** Effective immediately, one lead district, and its associated division office, will be designated for all for non-USACE projects that cross district or state boundaries (e.g. pipelines, highway projects, electrical transmission projects) and require either Section 10/404/103 review(s), Section 408 review(s), or a combination of both.

a. For non-USACE projects served by multiple districts within a single state, the lead district and division will be designated per the attached list.

b. It is recognized that requests for Section 10/404/103 review(s) and/or Section 408 review(s) may come into various districts at different times. Districts will be responsible for identifying when a non-USACE project crosses state boundaries and will elevate such non-USACE projects as soon as possible to their respective division office for designation of a lead district.

c. The applicable division office(s) will coordinate and designate a lead district within 7 days from the receipt of a complete Section 10/404/103 application or the receipt of the initial submittal requesting Section 408 permission for any point along the non-USACE project, whichever is received first.

e. If a lead district is not designated within 7 days as specified above, the division(s) shall immediately notify the HQUSACE, Chief of Operations and Regulatory Division. The HQUSACE, Chief of Operations and Regulatory Division will then designate the lead district no later than 15 days following the receipt of a complete application or receipt of the initial submittal requesting Section 408 permission.

f. Designation of the lead district will be documented in a memorandum for record.

SUBJECT: Designation of a Lead USACE District for Permitting of Non-USACE Projects Crossing multiple Districts or States

5. Roles and Responsibilities.

a. The lead district, in conjunction with the lead division where applicable, will have the following roles/responsibilities:

(1) Serve as the single point of contact for the project applicant.

(2) Form a Project Delivery Team (PDT) consisting of personnel from affected districts and divisions for coordination of reviews and decisions, where applicable.

(3) Perform all project management duties, including developing a review and decision schedule with milestones, timeline and critical path, coordinating the schedules and providing updates.

(4) Coordinate necessary requirements to meet review and decision milestones such as the need for a preliminary or approved jurisdictional determination, NEPA class of action, type of permit/permission, and information necessary for interagency reviews (i.e. historic properties, endangered species, state certificates, etc.).

(5) Ensure consistent review processes among the districts, with consideration for regional variability related to the different ecosystems/resources proposed for impact and/or the diversity of Federal projects and their Congressionally-authorized purposes.

(6) Be responsible to resolve inconsistencies in accordance with national Regulatory Program and Section 408 Program policies and guidance in a timely manner. Any unresolved issues will be elevated to the HQUSACE Regulatory office or the HQUSACE Section 408 proponent, copying the appropriate HQUSACE Regional Integration Team (RIT), within 7 days from when the PDT identifies the issue.

b. USACE will continue to use a watershed approach and other relevant criteria as basis for assessing site specific and cumulative impacts.

c. Existing criteria established in law, regulations, and policy documents still apply.

d. District/Division Commanders have authority to pursue alternative organizational approaches to enable efficient and effective implementation of this policy.

6. Proponent. The proponent for this memorandum is Mr. Thomas P. Smith, P.E., Chief, Operations and Regulatory Division, at 202-761-1983.

JAMES C. DALTON, P.E.
Director of Civil Works
