Make It Your Business To Fight The Flu
Promoting the Seasonal Flu Vaccine

A Toolkit for Businesses and Employers
Every year influenza, or “flu,” affects employers and businesses. Flu costs the U.S. approximately $10.4 billion* in direct costs for hospitalizations and outpatient visits for adults.

- While there are many different flu viruses, the flu vaccine protects against the viruses that research suggests will circulate the most this season.
- There are several flu vaccine options available:
  - Traditional flu vaccines made to protect against three different flu viruses (called “trivalent” vaccines) will be available;
  - Flu vaccines made to protect against four different flu viruses (called “quadrivalent” vaccines) also will be available.
  - For a complete list of all flu vaccine options, visit: http://www.cdc.gov/flu/protect/keyfacts.htm

Table of Contents

1. **Recommended Strategies for Businesses and Employers.** Learn what two strategies are recommended to businesses and employers this flu season.

2. **Promoting Seasonal Flu Vaccination: A Checklist for Businesses and Employers.** Use this checklist to get started!

3. **Flu Vaccine Clinic Here!** Host a flu vaccine clinic in the workplace and use this flyer. Complete with fillable text boxes so you can add the location, date, and time of your flu vaccine clinic.

4. **You Need a Flu Vaccine.** Encourage employees to get vaccinated at locations in the community. Navigate to the [HealthMap Vaccine Finder website](http://vaccine.healthmap.org/) at [http://vaccine.healthmap.org/](http://vaccine.healthmap.org/) to find locations offering flu vaccine, then update the flyer and post.

5. **Note to Self.** Share this flyer with employees to encourage flu vaccination. Consider posting this in the workplace, or copy and place in mailboxes or include in pay statements or newsletters.

6. **Note to Small Businesses.** Share this flyer with other workplace managers and supervisors to kickoff discussions about flu vaccination planning.

7. **Key Facts about the Flu Season.** Use this information at [http://www.cdc.gov/flu/protect/keyfacts.htm](http://www.cdc.gov/flu/protect/keyfacts.htm) to promote flu vaccination.

8. **Links.** Be aware of helpful links for businesses and employers.

9. **Web Tools.** Promote flu vaccination using web technology.

10. **Print Materials.** Take advantage of helpful materials to learn about seasonal flu, plus additional flyers and brochures.

11. **eCards and Social Media.**
Recommended Strategies for Businesses and Employers

The purpose of this Toolkit is to help businesses and employers fight the flu and to offer tips and suggestions to consider when planning and responding to the seasonal flu. Additional information can be found at the CDC website, http://www.cdc.gov/flu/business

CDC recommends two strategies this season for businesses and employers to help fight the flu.

**Strategy 1:** Host a flu vaccination clinic in the workplace.

To minimize absenteeism, employers frequently offer onsite seasonal flu vaccination to employees at no or low cost to their employees. This option can work well if the employer has an on-site occupational health clinic. If you don’t have a clinic, pharmacies and community vaccinators can be contracted to provide seasonal flu vaccination services on-site.

**Strategy 2:** Promote flu vaccination in the community.

Make sure your employees know where they and their families can get seasonal flu vaccines in their community. Additionally, find out what health care providers, pharmacies and clinics provide seasonal flu vaccines. Partner with a pharmacy or provider to get your employees vaccinated.

Even healthy people can get the flu, and it can be serious.
Promoting Seasonal Flu Vaccination
A Checklist for Businesses and Employers

Be a partner in good health. Consider offering onsite flu vaccination (flu shot, nasal spray, or both) at your business locations(s) and encourage employees to seek flu vaccination in the community. Review flu vaccination prevention and rationale with senior managers, employees, and labor representatives.

IF YOU CHOOSE TO HOST A FLU VACCINATION CLINIC

- Get senior management buy-in to support a flu vaccination clinic at the workplace.
- Frame getting employees vaccinated against flu as a business priority and create a goal aligned with this effort.
- Identify a flu vaccination coordinator and/or team with defined roles and responsibilities. Occupational health personnel or workplace safety staff may lead these efforts for employers. Determine if you will need to contract with an experienced outside provider of flu vaccination services (such as a pharmacy or community immunizer). The planning process should also include input from employees, and labor representatives, if needed.
- Schedule the flu vaccination clinic to maximize employee participation. Flu season usually begins in the Fall each year.
- Gauge need and demand among employees for flu vaccination. Provide sufficient and accessible flu vaccination in as many business locations as possible.
- Ask managers and supervisors to allow employees to attend onsite flu vaccination clinic as part of their work day and without having to “go off of the clock.”
- Consider offering flu vaccination to employees’ families.
- Set a goal and help show employees how their participation matters. Each year, try to improve upon the percentage of employees vaccinated.
- Use incentives for flu vaccination to increase participation, such as offering vaccine at no or low cost, providing refreshments at the clinic, or holding a contest for the department with the highest percentage of vaccinated employees.
- Promote the flu vaccination clinic with the following:
  - Posters about the importance of flu vaccination can be posted in break rooms, cafeterias, and other high traffic areas.
  - An article in company communications (i.e., newsletters, intranet, emails, portals, etc.) about the clinic and flu prevention.
  - Promotional posters/flyers to advertise the date and time of the clinic should be posted in high traffic areas.
  - Communication from business leadership directly to employees promoting vaccination.
  - Use Social Media channels for promotion!
- Provide a comfortable and convenient location for flu vaccination clinics. Consider the demands of space and need for privacy.
- Set an example by encouraging managers and business leaders to get vaccinated first.

IF YOU CHOOSE TO PROMOTE FLU VACCINATION IN THE COMMUNITY

- Be flexible in your HR policies. Establish policies that allow for employees to take an hour or two to seek flu vaccinations in the community.
- Partner with nearby pharmacies or clinics to arrange for employees to get vaccinated. If the business shares a building, shopping center, or office park with other employers, see if the property manager will host a flu vaccination clinic for all of the tenants’ employees.
- Use promotional posters/flyers to advertise locations in the community that offer seasonal flu vaccinations. Display posters about the flu vaccination in break rooms, cafeterias, and other high traffic areas.
- Post articles in company communications (i.e., newsletters, intranet, emails, portals, etc.) about the importance of flu vaccination and where to get the vaccine in the community.
- Encourage flu vaccination for employees’ families by distributing information for employees to take home.
Flu Vaccine Clinic Here!

CDC recommends everyone 6 months and older receive a yearly flu vaccine as the first and most important step in protecting against the flu.

Even healthy people can get the flu, and it can be serious.

Flu Vaccination

Why should people get vaccinated against the flu?

Flu is a serious disease that can lead to hospitalization and sometimes even death. Every flu season is different, and influenza infection can affect people differently. Even healthy people can get very sick from the flu and spread it to others. Over a period of 31 seasons between 1976 and 2007, estimates of flu-associated deaths in the United States range from a low of about 3,000 to a high of about 49,000 people. During a regular flu season, about 90 percent of deaths occur in people 65 years and older.

“Flu season” in the United States can begin as early as October and last as late as May.

During this time, flu viruses are circulating at higher levels in the U.S. population. An annual seasonal flu vaccine (either the flu shot or the nasal spray flu vaccine) is the best way to reduce the chances that you will get seasonal flu and spread it to others. When more people get vaccinated against the flu, less flu can spread through that community.
