The time is now for Congress to pass a targeted, substantial investment in modernizing our nation’s infrastructure.

Bipartisan action is necessary to pass a comprehensive package that transforms U.S. infrastructure systems to maintain U.S. economic competitiveness. Congress should work together to develop a more reliable, user-based funding stream to keep building roads, bridges, transit systems and highways far into the future.

This package should:

- Increase direct federal investments, in a broad range of infrastructure sectors over 10 years to achieve a $1-1.5 trillion investment,
- Complement and strengthen existing tools, such as municipal bonds, that successfully deliver infrastructure investments at the federal, state and local levels,
- Facilitate opportunities for private investment in U.S. infrastructure,
- Create efficiencies such as accelerating the federal permitting process,
- Fix chronic challenges and address reoccurring shortages in key federal infrastructure accounts such as the Highway Trust Fund, and;
- Encourage active participation among all levels of government and between the public and private sectors without shifting federal responsibilities because no single partner can deliver a well-functioning, national U.S. infrastructure network driven by a long-term vision and funding stability.

Making the Case

- If critical infrastructure needs remain unanswered, the U.S. will lose more than 2.5 million jobs by 2025 and more than 5.8 million jobs by 2040; and
  - it will cost households $3,400 per year from now through 2025.
- Shortfalls in funding for drinking and wastewater systems will cause the U.S. to lose $508 billion in GDP by 2025.
- Delay on the National Highway System annually, totals more than $63.4 billion and 996 million hours in lost productivity.
- Roadway congestion in the U.S. costs an additional 23 cents per mile to transport goods.
  - In the trucking industry, that amounts to ~$5,665 in excess fees annually for each truck nationwide – there are more than 11 million total trucks registered today.
